## PROJECTS

### Meet App

A serverless, progressive web application built with React using test-driven development technique. The application uses the Google Calendar API (OAuth2) to fetch upcoming events

Technologies used:

React.js, recharts, Bootstrap, Jest/Enzyme

Repo link: <https://github.com/Vybhavashri/meet>

Deployment link: <https://vybhavashri.github.io/meet/>

### MyFlix Client

A Client-side Single Page Application built with React, based on its existing server-side code (REST API and database).

Technologies used:

React.js, Parcel bundler, Bootstrap, Redux

Repo link: <https://github.com/Vybhavashri/myFlix-client>

Deployment link: <https://my-flix-client.netlify.app/>

## WORK EXPERIENCE

### SOFTWARE ENGINEER

Jul 2015 - Nov 2016

#### *Cerner HealthCare Solutions, India*

- Migrated pharmacy application from 'Delphi 7' to 'Delphi XE5' in order to replace obsolete components with newer version.
- Coordinated with UX/UI designers and Solution Architects to gather requirement specification and perform UI upliftment of all the screens of the payment module.
- Handled and fixed functional and UI defects reported by customers for an existing pharmacy application using C#.
- Involved in phases of conception, planning and execution of manual test cases to verify code quality.
- Took part in Scrum, Code review, Sprint planning meetings to ensure project deliverables are on track.

### SOFTWARE ENGINEER INTERN

Jan 2015 - Jun 2016

#### *Cerner HealthCare Solutions, India*

- Designed and developed application to track and automate the process of training enrolment using Delphi.
- Worked from scratch on UI Design, Database design and MVC architecture implementation to meet the requirements.
